I. INTRODUCTION

1.1. THE PURPOSE OF THE MODULE FRAMEWORK

This module framework contains important information regarding the content, assessments and administration of the module. The module framework is a document that is regarded as an agreement between the lecturer and student.

1.2. MODULE PREREQUISITES

None

1.3. MODULE OUTCOMES

After the successful completion of this module, students will have a good working knowledge of the following five broad themes, and have the necessary competencies to critically and creatively debated the related issues::

- Problems economists address: inequality, poverty, economic growth, sustainability, scarcity, choice Outcome 2
- Economic decision-making: incentives, relative prices, economic rent, labour, production, opportunity cost
- Economic relationships and interactions: game theory, equity, efficiency
- Markets: supply and demand, price-taking and competitive markets, elasticity
- Market dynamics: rent-seeking, taxation, market failure, externalities, and government policies

1.4. LANGUAGE OF INSTRUCTION

Economics 114 is presented according to the language option as indicated in the faculty language plan:

For undergraduate modules where it is reasonably practicable and pedagogically sound to have more than one class group, the following applies:

- There are separate lectures in Afrikaans and English.
- Learning opportunities, such as group work, assignments, tutorials, and practicals involving students from both language groups are utilised to promote integration within programmes.
- Students are supported in Afrikaans and English during a combination of appropriate, facilitated learning opportunities (e.g. consultations during office hours, or scheduled tutorials and practicals).

1.5. STUDENT ADVISING

Please consult your lecturer, module head or programme leader for advice related to module content and/or career advice as they are best positioned to offer guidance on matters related to academic material and future career trajectories.

The Registrar's division only deals with matters related to your academic programme, academic record and registration. Please email registrarems@sun.ac.za for more information or to schedule a consultation.

For student support services, please consult the Student Academic Advisor (emsinfo@sun.ac.za).

2. ADMINISTRATION

2.1. MODULE CONVENOR

Name	Office	E-mail address	Telephone number	Consultation hours
Dr Calumet Links	Schumann 601	calumetlinks@sun.ac.za	021 808 4071	By appointment

2.2. LECTURER & ADDITIONAL INFORMATION

Name	Office	E-mail address	Telephone number	Consultation hours
Dr K. Malindi	Schumann 610	kholekile@sun.ac.za	021 808 4082	By appointment
Mr J. Pretorius	Schumann 507	jhpretorius@sun.ac.za	021 808 2247	By appointment
Ms S. Dube	Schumann 507	lindadube@sun.ac.za	021 808 2247	By appointment
Ms R. Peterson	Schumann 507	rpeterson@sun.ac.za	021 808 2247	By appointment
Mr R. Dysan	Schumann 507	23085002@sun.ac.za	021 808 2247	By appointment
Ms G. Jacobs	Schumann 507	gabyjacobs@sun.ac.za	021 808 2247	By appointment

Internal moderator: Mr. M van Schoor

Physical address of the department: 5th & 6th floors, CGW Schumann Building, Bosman Street

Departmental telephone number: 021 808 2247

2.3. GROUPS

At registration students will automatically be placed into a designated group. This information is available on My.SUN and EMSLearn and is important for your schedule.

2.4. LECTURE TIMES

Lectures will be presented on the following days and times during 2026:

Group and Language	Day	Time	Venue
GR 1.1/Eng	Monday Wednesday Thursday	08:10 09:10 12:10	Maths/Ind Psyc 1005 Maths/Ind Psyc 1005 Maths/Ind Psyc 1005
GR 1.2/Eng	Monday Wednesday Thursday	08:10 09:10 12:10	Schumann Annex 2020 Schumann Annex 2020 Schumann Annex 2020
GR 2.1/Eng	Monday Wednesday Thursday	09:10 12:10 08:10	Van der Sterr 1011 Van der Sterr 1011 Van der Sterr 1011
GR 2.2/Eng	Monday Wednesday Thursday	09:10 12:10 08:10	Van der Sterr 1024 (Entrance 4) Van der Sterr 1024 (Entrance 4) Van der Sterr 1024 (Entrance 4)
GR 3.1/Afr	Monday Tuesday Friday	16:10 14:10 10:10	Schumann Annex 2020 Schumann Annex 2020 Schumann Annex 2020
GR 3.2/Eng	Monday Tuesday Friday	16:10 14:10 10:10	Maths/Ind Psyc 1005 Maths/Ind Psyc 1005 Maths/Ind Psyc 1005
GR 3.3/Eng	Monday Tuesday Friday	16:10 14:10 10:10	Van der Sterr 1024 (Entrance 4) Van der Sterr 1024 (Entrance 4) Jan Mouton (<i>on 25 Feb: Van der Sterr 1010 – Entrance 6</i>)

The attendance of all activities are compulsory.

3. RESOURCES

3.1. PRESCRIBED TEXTBOOKS

The Core Team (CORE 2.0) (2023). The Economy 2.0: Microeconomics. CORE Economics Education: United Kingdom.

This textbook is available for free as an eBook. More information will be given in class.

3.2. SUGGESTED ADDITIONAL RESOURCES AND LITERATURE

Class notes and additional resources will be provided on EMSLearn.

4. LEARNING METHODOLOGY

4.1. METHOD OF INSTRUCTION

Principles of adult learning, with an emphasis on blended learning, will be applied. Methods of instruction include theoretical inputs, class discussions, workshops, practical exercises, practical projects and case studies. You are invited to participate interactively in this module and ask questions in class whenever anything is unclear.

4.2. PARTICIPATION IN MODULE ACTIVITIES

Stellenbosch University is a residential university that provides teaching through face-to-face contact time complemented by an online learning management system (EMSLearn). To ensure that you master the learning outcomes of this module, there is an expectation that you keep up with the learning activities and actively participate in both the online and face-to-face components of the module.

4.3. TUTORIAL CLASSES

THE PURPOSE OF THE TUTORIAL PROGRAMME: TO ENHANCE STUDENT SUCCESS

The Economics 114 Tutorial Programme forms an integral component of the module. Students must be clearly informed about the structure and functioning of the programme, its role within the module, and the importance of regular tutorial attendance.

It is essential that students understand that formal lectures and tutorial classes are complementary, not interchangeable. To achieve success in Economics 114, students are therefore strongly encouraged to attend both lectures and tutorials consistently and conscientiously.

HOW WILL THE ECONOMICS 114 TUTORIAL PROGRAMME WORK?

The Economics 114 tutorial programme follows a weekly, in-person tutorial model.

Tutorial question sets will be made available on EMSLearn in the week preceding each tutorial. These sets consist of assessment-type questions – often drawn from previous Economics 114 assessments – designed to test students' understanding of the new economic concepts covered in the formal lectures each week. The primary purpose of the tutorial classes is to support students in learning how to approach and answer such questions correctly.

Students are expected to arrive at tutorials well prepared. This includes working through the tutorial question sets in advance, using the prescribed textbook, lecture slides, and their own notes. Preparation is essential for meaningful participation and for engaging actively in tutorial discussions.

Importantly, the objective of the tutorials is not merely to provide the correct answers, but to develop students' understanding of how to think through and solve economic problems. For this reason, solutions to the tutorial questions, as well as to any additional questions discussed in class, will be provided only during the tutorial sessions. No written memoranda will be distributed, and tutors are not permitted to release solution sets outside of the tutorials. These discussions are therefore a key benefit of attending in person.

While tutorial attendance is not compulsory, students are strongly encouraged to make full use of this learning opportunity to keep pace with the course and to consolidate their understanding of the material.

At the start of the semester, students will be assigned to permanent learning groups, within which all tutorial activities will be completed. Students may prepare for tutorials either individually or collaboratively within their groups. Such preparation enables deeper engagement with the material and supports more productive participation during tutorial sessions.

During the tutorials, students will also work on unseen questions that must be solved collectively. These questions are designed to extend students beyond their individual preparation and to promote the use of shared reasoning and problem-solving within the group. Through this process, students will develop critical thinking, collaborative skills, and the ability to apply economic concepts in new contexts -- competencies that are central to success in Economics 114.

This structured, group-based learning approach not only strengthens conceptual understanding but also reflects real-world problem-solving environments, where cooperation, analytical thinking, and adaptability are essential.

There are a total of eight tutorial time slots per week, namely:

Mondays from 13:10-14:00

Mondays from 14:10-14:00

Tuesdays from 12:10-13:00

Wednesdays from 13:10-14:00

Wednesdays from 14:10-15:00

Thursdays from 09:10-10:00

Thursdays from 11:10-12:00

Thursdays from 13:10-14:00

Any further questions related to the tutorial programme can be sent by e-mail to ekontuts@sun.ac.za. We would like to wish you all the best with your studies this year.

4.4. CONSULTATION TIMES AND THE USE OF THE EMSLEARN DISCUSSION FORUM

Each lecturer's consultation hours are made available in the "lecturer & additional information" section of this module framework. You are expected to make an appointment with lecturers in advance.

The Discussion Forum function on EMSLearn should be used for all queries relating to the course content of the module. The discussion forum enables peer-to-peer learning and students are encouraged to answer each other's questions. Peer learning and individual student engagement are incredibly important in any learning environment. For this reason, posts should not be addressed to the lecturers. It is not necessary to start and sign-off the posts with formal greetings as one would with an email. If the query consists of multiple questions, please number the questions. Questions posted on the Discussion Forum will be answered in the language in which it was raised.

All queries not relating to the course content can be emailed to the lecturer. If a query about course content is of such a nature that it is difficult to ask and / or answer on the Discussion Forum, you are welcome to make an appointment with the lecturer.

E-mails to lecturers and queries on the Discussion Forum will be answered during office hours within a reasonable time, taking lecturers' other responsibilities into account.

Please note that the EMSLearn Discussion Forum is a public platform.

4.5. COPYRIGHT

Stellenbosch University holds the copyright to all material in this module. Material which is made available through EMSLearn may be subject to certain licencing conditions. You may only use the material for your own private study and research at the University and not for any other purpose. Printed material is also only made available for class discussion, private study and research purposes. Further reproduction or distribution of such material is prohibited. Contravention of these rules will result in disciplinary action and may result in legal action.

5. ASSESSMENT FOR SEMESTER MODULES

The Faculty's Assessment Rules are available online at www.sun.ac.za/ems, under the 'current students' tab. Please watch the information video on your module's EMSLearn page and make sure you read the section on Assessment in the module framework carefully.

The faculty's approach to assessment places the responsibility of learning with the student. Therefore, you must make use of all available assessment opportunities as far as possible and ensure that you understand how assessment in the module works.

5.1. ASSESSMENT OPPORTUNITIES

Assessment 1 (A1) Test 8 April 2026 Contribution to FM: 40 %

Formative Assessment Further (FAF) Online quizzes and tutorials (will be announced beforehand on EMSLearn and in class) Tutorials and Quizzes All students are strongly encouraged to attend the tutorial classes and complete the quizzes, as these are valuable opportunities to engage with problem sets that align with the level of assessment for the course. Regular participation will enhance understanding and better prepare students for evaluations.
Assessment 2 (A2) Exam 23 May 2026 Contribution to FM: 60 %
Assessment 3 (A3) Exam 25 June 2025 Contribution to FM: 60 %

Internal Moderator: Dr M. van Schoor

Religious and cultural days: In addition to public holidays, during which the University will be closed for business, no assessments will be scheduled on specific religious and cultural days that are noted in the SU Almanac. If any main assessment is scheduled on a religious or cultural day not included in the almanac, it is the student's responsibility to request special arrangements. The following apply:

- For A2 and A3 the Assessment Office will make the necessary arrangements where possible. Visit the Assessment Office in Admin A throughout the course of the last two class weeks of the semester.
- For A1 the department/school will make the necessary arrangements if it can be feasibly done in accordance with the arrangements usually made by the Assessment Office for A2 and A3. If a student wants to request special arrangements, they must contact the lecturer at least two weeks before **each** assessment opportunity.

The calculation of your final mark (FM) is based on a weighted formula. The formulas are used to calculate your progress throughout the semester and the marks will be made available on SUNStudent. The formulas are as follows:

MTD (mark to date) before A2:

$$\text{MTD} = (W_{AF}/W_{\text{sum}}) AF + (W_{A1}/W_{\text{sum}}) A1$$

If you did not write A1, you will not receive an MTD.

FM1 after A2:

$$FM1 = (W_{AF}/W_{sum}) AF + (W_{A1}/W_{sum}) A1 + (W_{A2}/W_{sum}) A2$$

FM1 is assigned only if you wrote A2 and A1.

FM2 after A3:

$$FM2 = (W_{AF}/W_{sum}) AF + (W_{A1}/W_{sum}) A1 + (W_{A2}/W_{sum}) A2 + (W_{A3}/W_{sum}) A3$$

FM2 is assigned only if you wrote at least two main assessments.

When calculating the MTD or a FM using the formulas please note the following:

- W_{sum} is the total weight of all the assessments you completed. Even if you missed main assessment opportunities the total weight will at least be 1.
- For all missed main assessment opportunities (A1, A2 and A3), the weight of the relevant assessment will be reduced to zero in the mark calculation formula (however w_{sum} will never be less than 1).
- Your FM for the module is the highest of FM1 or FM2.

5.2. PASS REQUIREMENTS

Firstly, a **valid** final mark of **at least 50** is required to pass the module. To obtain a valid final mark you must:

- Complete at least one of A2 or A3
- Complete at least two main assessment opportunities

If you do not obtain a **valid** final mark, you will fail the module and no final mark will be allocated to you.

5.3. ACCESS TO ASSESSMENT 3 (A3)

Note that it is not necessary to submit medical certificates or any other documents for missed assessment opportunities.

You have access to A3 if either of the following applies:

- If you completed all of the main assessment opportunities other than A3 (A1, A2) but have not obtained an FM of 50 or more, you have access to A3 in order to improve your FM to 50.
- You missed a main assessment opportunity (A1 or A2) for whatever reason. In this case, a FM of 50 or more can still be obtained if you make use of A3.
- If you missed two main assessment opportunities (A1, A2), you cannot obtain a valid FM and therefore you fail the module. However, you still have access

to A3 in order to allow you the opportunity to obtain a FM that could adhere to prerequisites or other requirements.

No further assessment opportunities will take place after A3.

5.4. WORK COVERED PER ASSESSMENT OPPORTUNITY

The prescribed work covered per assessment opportunity is as follows:

- Assessment 1: Units 1,2,3,4 and 5
- Assessment 2: Units 4,5,6,7,8 and 10
- Assessment 3: The entire semester's work.

5.5. TURNOVER TIME/FEEDBACK

Students can expect feedback within 3 weeks of writing a formal assessment.

5.6. HANDOUT OF TESTS AND APPEAL PROCEDURE

Marks and books will be available 3 weeks after the Assessment is written. Details about the appeal procedure will be published on EMSLearn.

6. ACADEMIC INTEGRITY AND THE USE OF GENERATIVE AI TOOLS IN THIS MODULE

Students may make use of Large Language Models (LLMs) as a supplementary learning tool; however, they should not rely on such tools as their primary source for solving complex problems or for clarifying theoretical concepts. LLMs can be useful for initial orientation or for checking understanding, but they cannot replace the depth of reasoning, contextual insight, and conceptual rigour developed through careful engagement with the prescribed textbook, lecture notes, and direct interaction with lecturers and tutors. We therefore strongly recommend that students first work through the relevant course material and consult teaching staff where needed, and only thereafter use Artificial Intelligence tools as a supportive, not substitutive, resource.

7. WORK PROGRAM

Week	Date	Topic	Asynchronous activities	Synchronous activities
1	9/2/2026-13 /2/2026	Prosperity, inequality, and planetary limits	Unit 1	
2	16/2/2026-20/2/ 2026	Technology and incentives	Unit 2	
3	23/2/2026-27/2/2026	Scarcity, wellbeing, and working hours	Unit 3	FAF 1 Tutorial 1

4	2/3/2026- 6/3/2026			FAF 2 Tutorial 2
5	9/3/2026- 13/3/2026	Strategic interactions and social dilemmas	Unit 4	FAF3 Tutorial 3
6	16/3/2026- 20/3/2026	The rules of the game: Who gets what and why?	Unit 5	Tutorial 4
7	23/3/2026- 27/3/2026	The firm and its employees	Unit 6	FAF4 Tutorial 5
8	6/4/2026- 10/4/2026	The firm and its customers. Supply and demand: Markets with many buyers and sellers	Unit 7 Unit 8	
9	13/4/2026- 17/4/2026			FAF5 Tutorial 6
10	20/4/2026- 24/4/2026			Tutorial 7
11	27/4/2026- 1/4/2026			
12	4/5/2026- 8/5/2026			FAF6 Tutorial 8
13	11/5/2026- 15/5/2026	Market successes and failures: The societal effects of private decisions	Unit 10	End of Semester

8. IT MAINTENANCE WEEKENDS

Note to lecturers: please note the IT maintenance weekends below when scheduling online assessment submissions.

The following dates is reserved for IT maintenance during 2026:

- Fri, 27 Mar 2026, 21:00 to Mon, 30 Mar 2026, 07:00
- Fri, 3 Jul 2026, 17:00 to Mon, 6 Jul 2026, 07:00
- Fri, 4 Sept 2026, 21:00 to Mon, 7 Sept 2026, 07:00
- Fri, 11 Dec 2026, 17:00 to Mon, 14 Dec 2026, 07:00
